

EVR 2

Tennis Court Lighting

The ball's in your court... Can you see it?

The ELSCO EVR 2 has been the light of choice for high performance Tennis Court installations for many years and can be seen on hundreds of courts across the nation – both residential and Tennis clubs. It is designed with a sharp cut-off forward throw optical system which pushes the light produced uniformly onto the court area and minimizes glare and discomfort both to the court users and neighboring properties. Double seals on the door keep moisture and bugs out of the fitting, ensuring that your luminaire continues to perform long into the future.

EVR 2 1000W, EVR 3 1500W
